QUESTIONS

LEVEL 3 — HARD

Q1

Numbers

**Q2**

Control

2 / 2 saved

Level 3 — Hard (H) Permutations — Numbers

Submitted

Write a program to print unique permutations of a given number

Sample Input:

Given Number: 143

Sample Output:

Permutations are:

134

143

314

341

413

431

Testcase: 1. 0

2. 111

3. 505

4. -143

5. -598

Your Code

```
1 class Main{  
2     public static void main(String[] args)
```

```
3      int i,j,k;
4      String num = "143";
5      for(i=0;i<num.length();i++){
6      for(j=0;j<num.length();j++){
7      for(k=0;k<num.length();k++){
8      if(i!=j&&i!=k&&j!=k)
9          System.out.println(""+num.charAt(i)+num.charAt(j)+num.charAt(k));
10     }
11     }
12     }
13 }
14 }
```

Output

```
143
134
413
431
314
```
